

With permission from the respected director of meeting... Salute to all members, ladies and gentlemen. In this universal community, I express my adhered country's opinions about the kingdom of Spain. It seems that today the world is in need of providing more international peace and security. The matter which is contemplated for so long by legislators and actors of international stage. The Spanish countries which counted as an important civilized and cultural family, are for years the victims of terrorism. Also in many years, they had been under extreme colonialism by some western authorities. National liberation movements in these lands took place to author the right to determine the fate for nations. But unfortunately, today we see that some of these moves has turned into a terrorism act and brought about many catastrophes. Using children, smuggling guns... produce and trafficking drugs and so on are a part of behaviors which are terror-like and are against the norms in international stage. But Again, today we are honored to say: The winner of peace prize for Nobel is a Spanish speaker. The respected president of Columbia, that after 35 years has ended the bloody fight between vigilantes and central government. With observing these conditions, it seems that It is right for the New world order to select a person familiar with Spanish culture as general secretary. The person which in past had been active in united nations and has brought a lot contributions to economic development and welfare improvement of societies. Therefore, on the beauty of the existing dossier, I introduce Sir... as our upcoming secretary-general. I'm grateful of audiences and colleagues for companionship and paying attention.... (agent of Spain in security court of united nations).
